Synactive: GuiXT Technology

Simplify, Clarify, and Optimize SAP
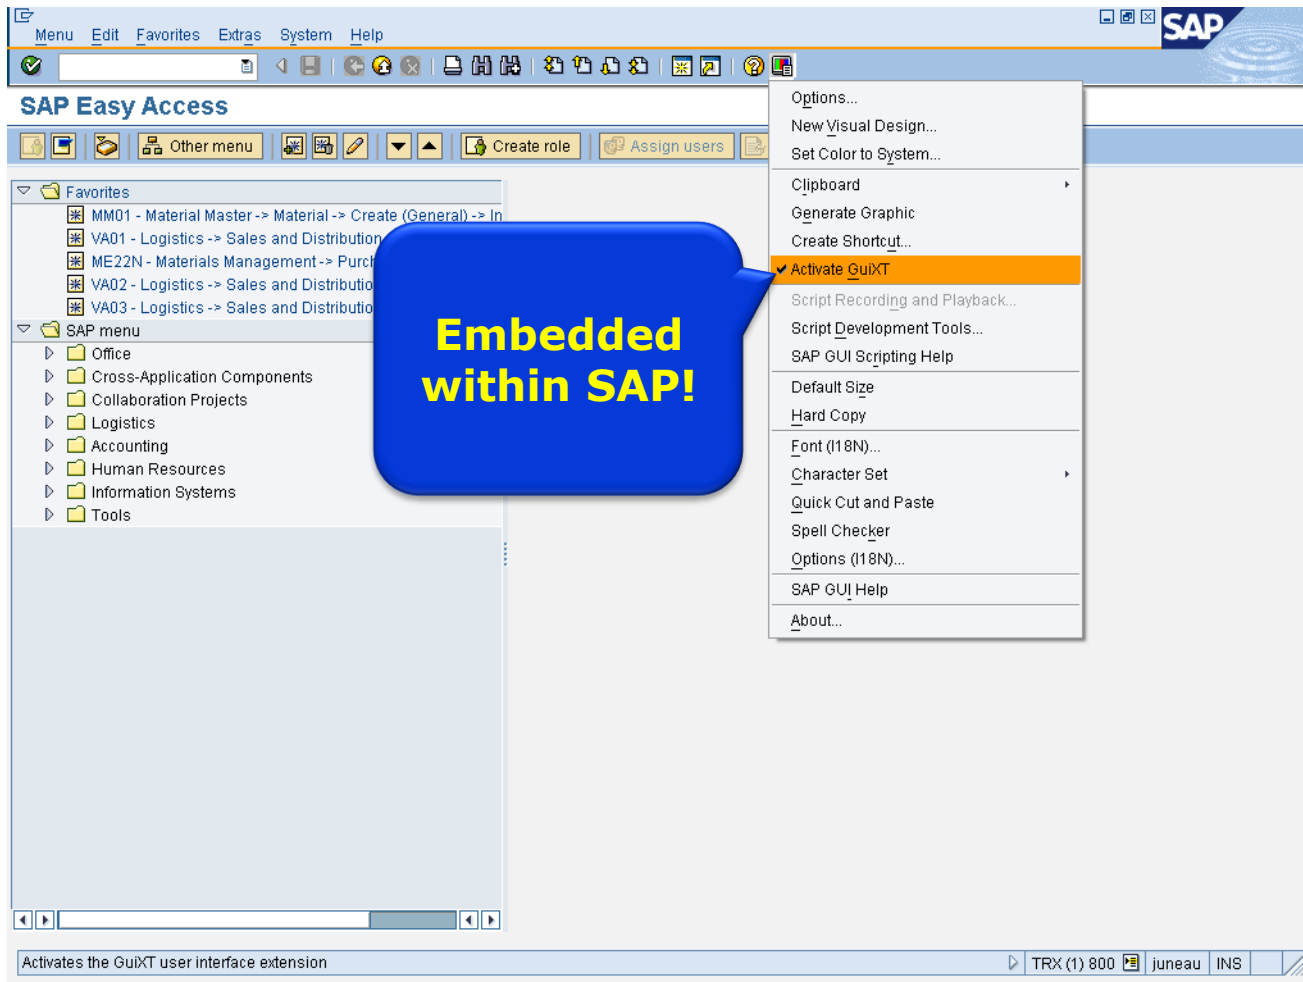

➢ GuiXT Technology

    ➢ Embedded in SAP

    ➢ Certified by SAP for NetWeaver Portals

    ➢ No backend code changes

➢ Benefits

    ➢ Faster SAP Data Entry

        ▪ Input sets automatically fill in common information in SAP fields

        ▪ Set default values

        ▪ Less manual entry for users means fewer mistakes

        ▪ Streamline business processes, remove unwanted fields, and consolidate screen tabs

# How Business Users Can Simplify the SAP User Interface

Why the Developer Toolkit?

- Increased SAP User Adoption

- Create More Intuitive Screens

- One Platform, Many Touch Points

- Customize Transactions Quickly and Easily

- Make Updates Effortlessly

- Remove Distractions, Confusion, and User Error

- Consolidate/Optimize Data Entry

What is in the Developer Toolkit

- Designer

  - Tool for Business Users (WYSIWYG) and IT (Scripting)

- Workbench

  - Tool for Business users for Excel/PDF and IT for SAPGUI
  - No Scripting

  - Auto-generated UI

GuiXT Designer

Make Changes to the SAP Interface Quickly and Easily

- Record multiple screens and generate into one SAPGUI screen, Excel or PDF interface

- Use WYSIWYG editor for Drag and Drop automation

- Create different interfaces for different user groups

- Modify views, change positions and delete fields or groups of fields

- Add push buttons, input fields, group boxes and images
